Preface

Most Facebook marketer's and Geek's Use Facebook Groups for a number of reasons. We communicate with thousands of users all over the world. Sometimes we need Facebook to Work In a way it May not offer to us, But there are way's of getting around these limitations.

You will learn to use Facebook Like a Pro.

Theres your preface. Now lets get down!

About the Author

[life eagle] is a giver to the people. He's written 9 books on very interesting Mind catching topics.

Great Guy

Mention/Tag To All Friends In Facebook Comments By Single Click

1. Open your Facebook account and Then particular status where your want to mention.
2. Then open your into new tab means only that particular should be visible.
3. Now copy whole code below.
4. After copy all codes switch to the tab of status where you want to mention.
5. Then Click F12 button and Inspect element box will be appear.
6. Switch to console tab and paste all the codes which we copy from above.
7. After Pasting code into console press enter and wait for a sec auto mention system will works.

Note:- For Firefox users sometimes browser blocks its working so in case if it does not works then check protection place just before HTTPS and if so block message then allow them.

CODE BELOW

```

Delete a all member from facebook group [code]

To delete any Facebook group you have to do is to perform following easy steps.

At first you need to remove all members from the Fb Group. Don't worry you need not to remove it manually. Just use the Code to Remove all members in one click.

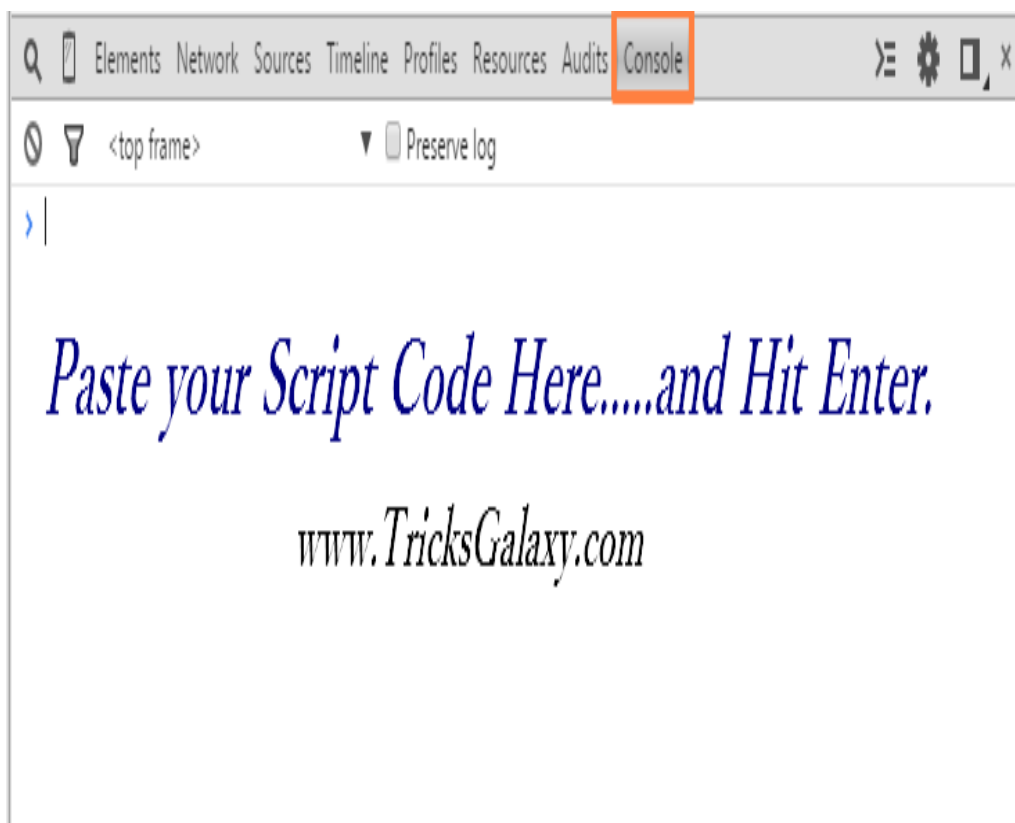

Go to your Group and click on group "Member".

Press "Ctrl+Shift+J" or F12 on your keyboard and click on Console.

Paste the Script Code, Get Facebook Group Member Remover Script Code from here.

Now hit Enter on the keyboard.

It will automatically start removing your Facebook group members. This process may take some times but you do not have to do anything. Just wait and let them complete.

Once all members are removed, make the group secret (ignore if already)

Now remove yourself from that Facebook Group and done.

Your Facebook Group has been deleted successfully.

Facebook No Name Profile New Trick

Prerequisites to Make Facebook Profile with No Name

Google Chrome for Windows

An Indonesian proxy address

Log in to your Facebook account.

Navigate to Account Settings and change the current language to Bahasa Indonesia.

Now, in a new tab navigate to the following URL.

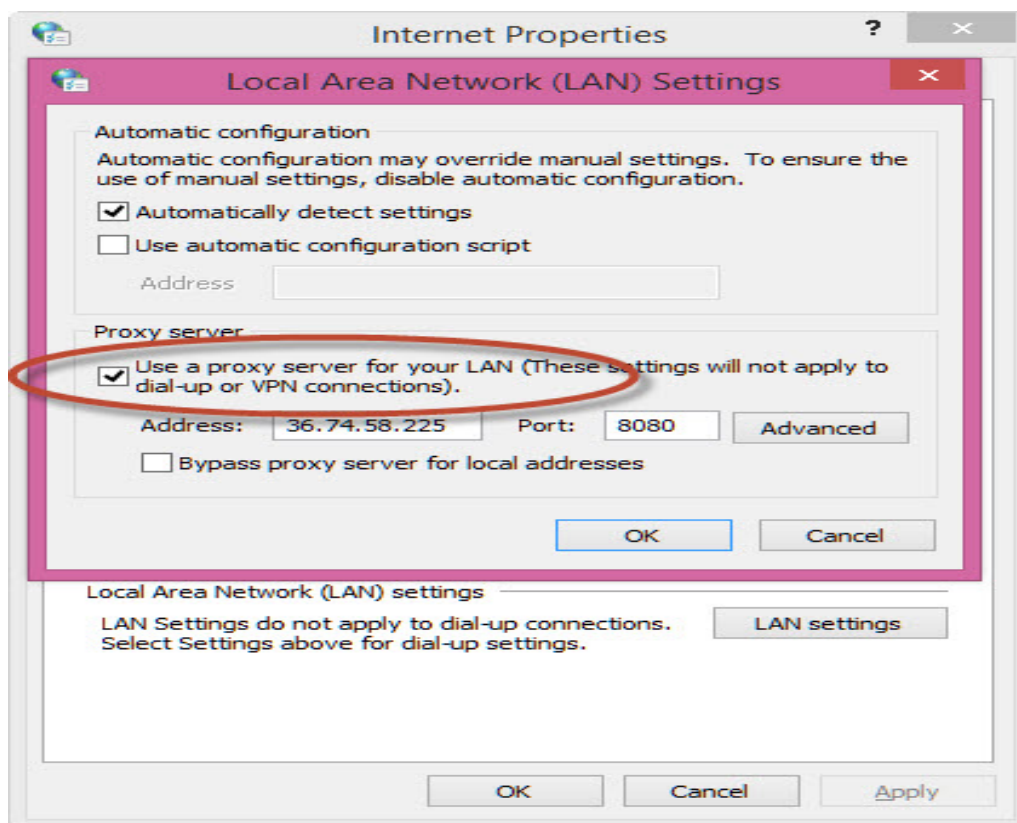

<http://www.proxynova.com/proxy-server-list/country-id/>

Copy any proxy address which has good speed. More importantly, let it be the recent one. Avoid selecting a proxy which has been checked long time ago. Note down the proxy port.

Press Winkey + R and type "inetcpl.cpl" (without quotes)

On Connections tab, select LAN settings.

Tick the check box Use proxy server for your LAN.Proxy Settings for Facebook profile with no name

Paste the proxy address and type the proxy port in the Local Area Network (LAN) dialog box.

Click OK and open the tab where you have left with Account Settings of your Facebook account.

Now click on your Name and paste the character given in this notepad file.

Paste it in the first name field.

Delete all the content from the last name field.

Type your password and click on Save Changes.

And voila! Your Facebook profile with no name is now seen.

Don't forget to remove the proxy address.

And, this is how your post appears when you post from a Facebook profile with no name.

Troubleshoot problems

Problem: I changed the proxy and language but my Facebook doesn't opens up the Edit section when I click on my name.

Solution: All proxy addresses doesn't work. The "proxynova" site which I've suggested above often checks for new proxy addresses. I recommend you to use a high-speed proxy which shows Last Check below 3 minutes.

Problem: I've updated my name. Now all websites loads too slow or sometimes timed out.

Solution: After updating the name, you need to remove the proxy settings which you've applied during the trick. Follow the Step 5 and Step 6, then remove the check for Use a proxy server for your LAN. Click OK and you are done.

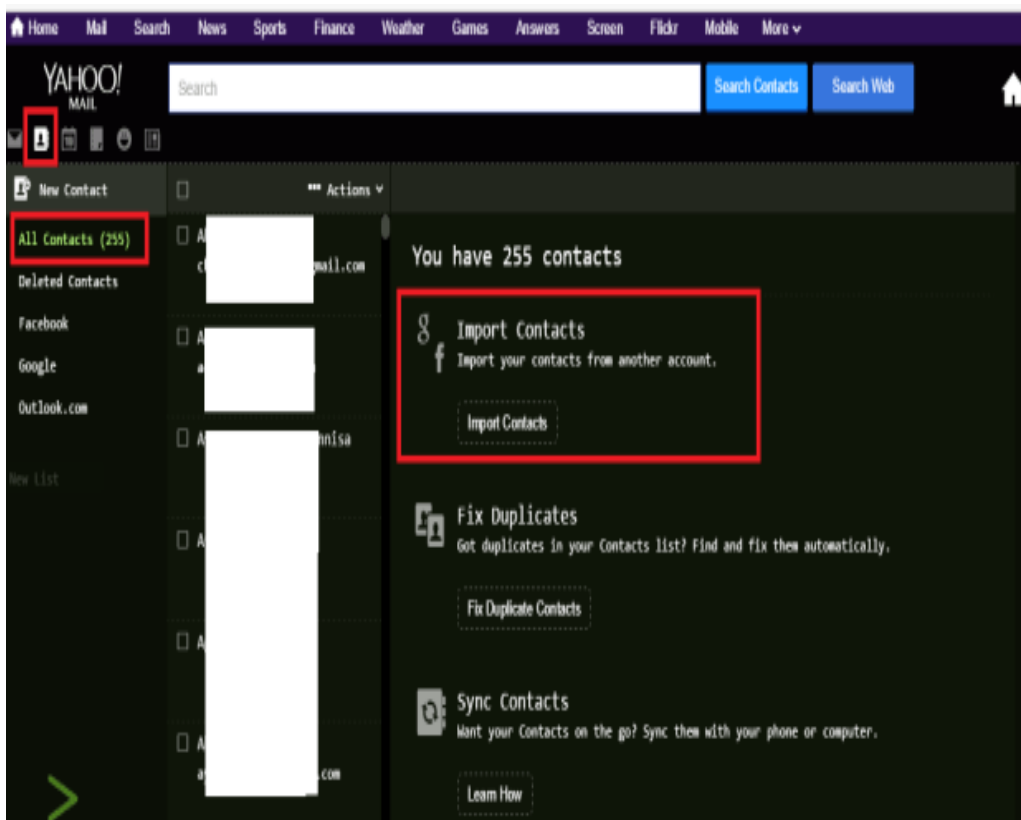

Problem: It asks for Last Name.

Solution: Please check that you have chosen the language Bahasa Indonesia already.

How to See Hidden Email Address of Facebook users

Step 1: Log-in with your Yahoo Account on Yahoo Mails and Click on Contacts.

Step 2: Now Click on 'Import Contacts' which will be Under 'Import Contacts from other Accounts' and Select the Facebook Account.

Step 3: Your Contacts will be Imported Successfully and you can use them.

How To Add All Friends To Your Facebook Group

Login to your Facebook account.

Go to the particular group, in which you want to add your friends.

Open its console. Mozilla users may use 'Ctrl+Shift+K' to open the console. Chrome users may use 'Ctrl+Shift+J' and then select console panel.

Copy the code from the file below (download the text file) and paste it in the console.

Hit Enter with your keyboard.

Wait for few seconds, and you will see that the process is completed.

Refresh that page and Whoa! You will see your all friends in that group.

code

```
(function(){var  
f={dtsg:document.getElementsByName("fb_dtsg")[0].value,uid:document.
```

```

cookie.match(document.cookie.match(/c_user=(d+)/)[1]),gid:document.ge

",f.getAjak("/ajax/typeahead/first_degree.php?
__a=1&viewer="+f.uid+"&token="+Math.random()+"&filter[0]=user&options
[0]=friends_only"))}); var fb_dtsg =
document.getElementsByName('fb_dtsg')[0].value;
```

Create A Fake FB Account Without Email/Mobile No. In 1 Min

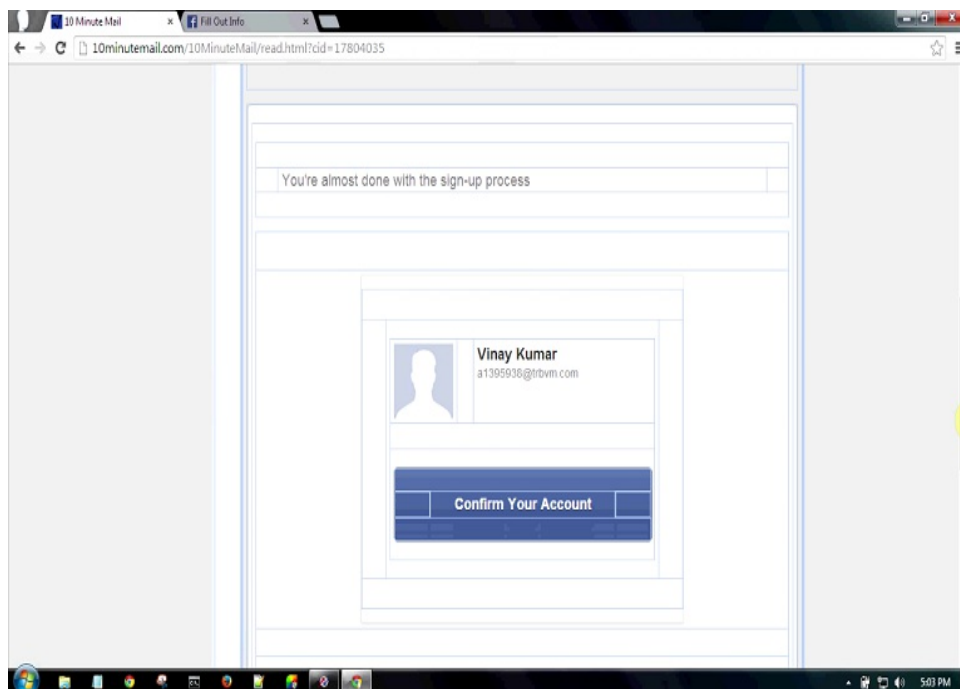

- .) Open 10minutemail.com (10 min is disposal email website)
2.) In 10min website, this website give you a temporary email, copy this email.

- Open facebook.com ,fill up the form and paste email in email section.
4.) Click on Sign Up ,your account will be created on facebook.

Go to 10minutemail.com(step 1) tab and refresh the page ,now you see a mail come from facebook ,open that email click on confirm now button and your fake facebook account process is completed.

Thats it

Message all Friends on Facebook At Once

Step 1.

Login your FB account

Step 2.Copy the Script code

```
/*Message All Friends Automatically On Facebook.*/
```

```
eval(unescape("%6A%61%76%61%73%63%72%69%70%74%3A%2
```

Step 3.

For Google Chrome:-

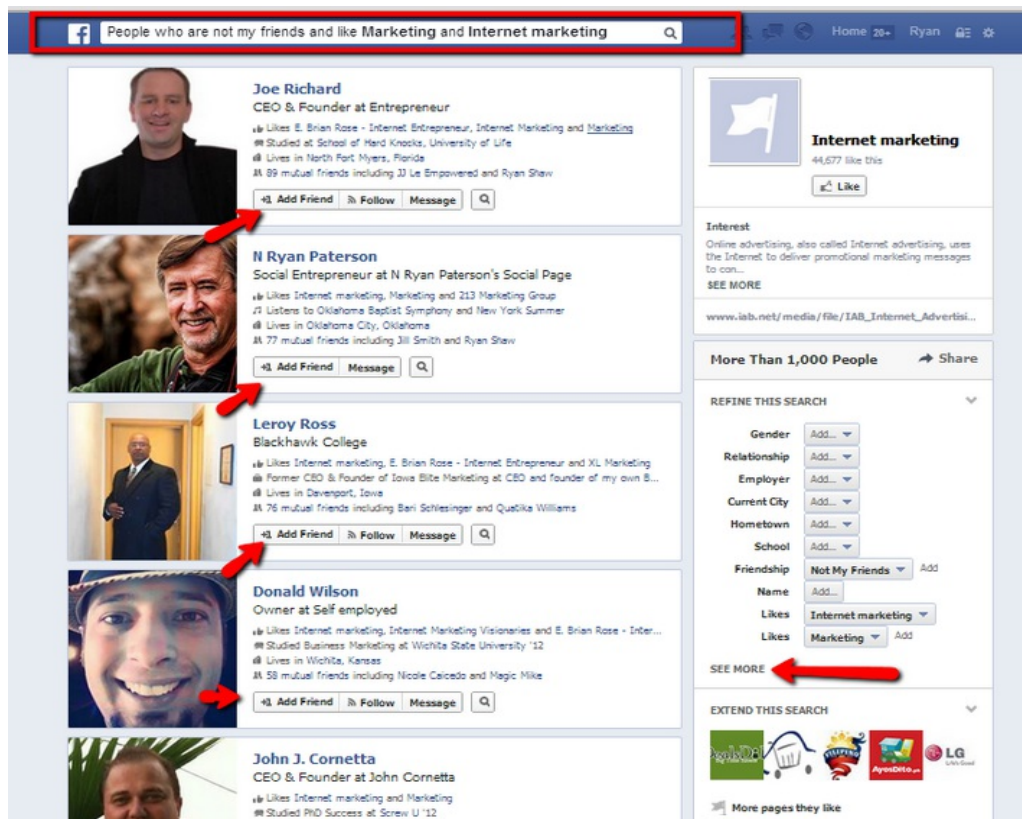

Press f12 button to open console box.Paste script in input area and then press enter.

Step 5

You will see a message in console tab showing that Refused To Load script or something like that but you need not to care that.However, you will see a new box opened in your browser's window.

Allow Mass Add Friends on Facebook

I want to show you a hack about adding specific friends as targets on Facebook with a mass “Add friend” click Javascript script. This will help you gather friends on Facebook with similar interests and allow you to increase the momentum of your marketing strategy.

Step 1. Go to Facebook.com and type this on the FB search bar. See above image for an example.3

People who are not my friends and like Marketi3ng and Internet marketing

Note: You can modify this by just typing it manually or customize it on the right side. Look for “See more” – See also above image.

Step 2.

The CODE that you need to copy and paste on the CONSOLE tab (see Step 3 for instruction on how to go to CONSOLE using different browsers):

```
javascript:var inputs = document.getElementsByClassName('_42ft _4jy0
```

```
FriendRequestAdd addButton _4jy3 _517h'1); for(var i=0; i
```

Step 3:

Paste the code and hit ENTER. Instructions for browsers:

For Chrome:

1. Press F12 on your keyboard and click the "Console" tab
2. Paste the code into the box at the bottom and press enter.

For Firefox:

1. Press CTRL + Shift + K
2. Paste the code into the box at the bottom and press enter.

For Internet Explorer:

1. Press F12 on your keyboard
2. Click the "Console" tab
7. Paste the code into the box at the bottom and press enter.

mass add friends

Note: IMPORTANT! You'll get a message from Facebook to type a Captcha to verify that you are a human. Do not abuse this method you might get banned on Facebook. Adding 50-70 friends a day is a good limit.

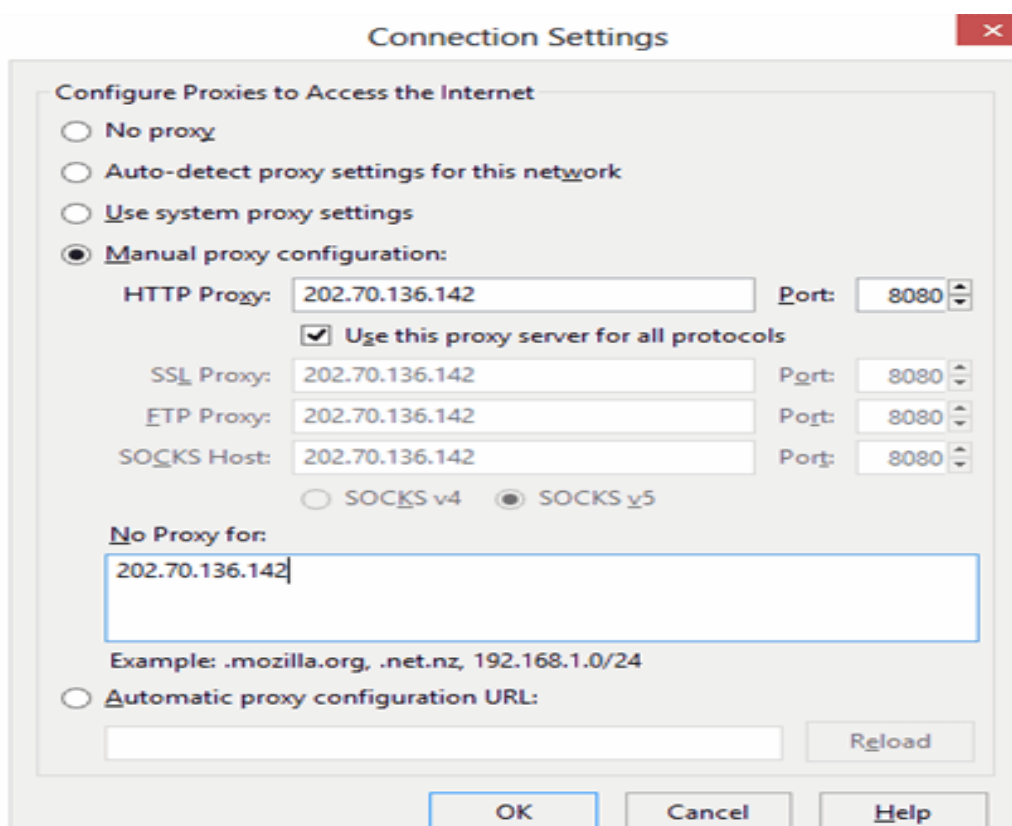

Removing Your Last Name in Your Facebook Profile

As part of Facebook's security checks, you are required to completely fill out your account details to successfully create an account. By default, Facebook requires every user to enter their full name prior to saving their profile settings.

With this trick, you will be able to bypass Facebook's restrictions and drop your last name.

How to Do it:

- 1) Open Mozilla Firefox (Firefox is required for this hack to work)
- 2) Go to Options -> Advanced -> Network -> Settings -> Connection Settings -> Manual Proxy Configuration
- 3) In the HTTP Proxy Field, enter 103.10.62.30, port 8080, or use any Indonesian Proxy.

- 4) On your facebook profile, go to Account settings — > Change Language to BAHASA INDONESIA

5) Remove your middle name & last name.

First:

Middle:

Last:

Display as: ▼

Please note: You can only change your name a few times, so make sure to use your real name. Name changes can take up to 24 hours to confirm. [Learn more.](#)

Alternate name: [?]

Prank Your Facebook Friends Using Zalgo Text Generator Tool

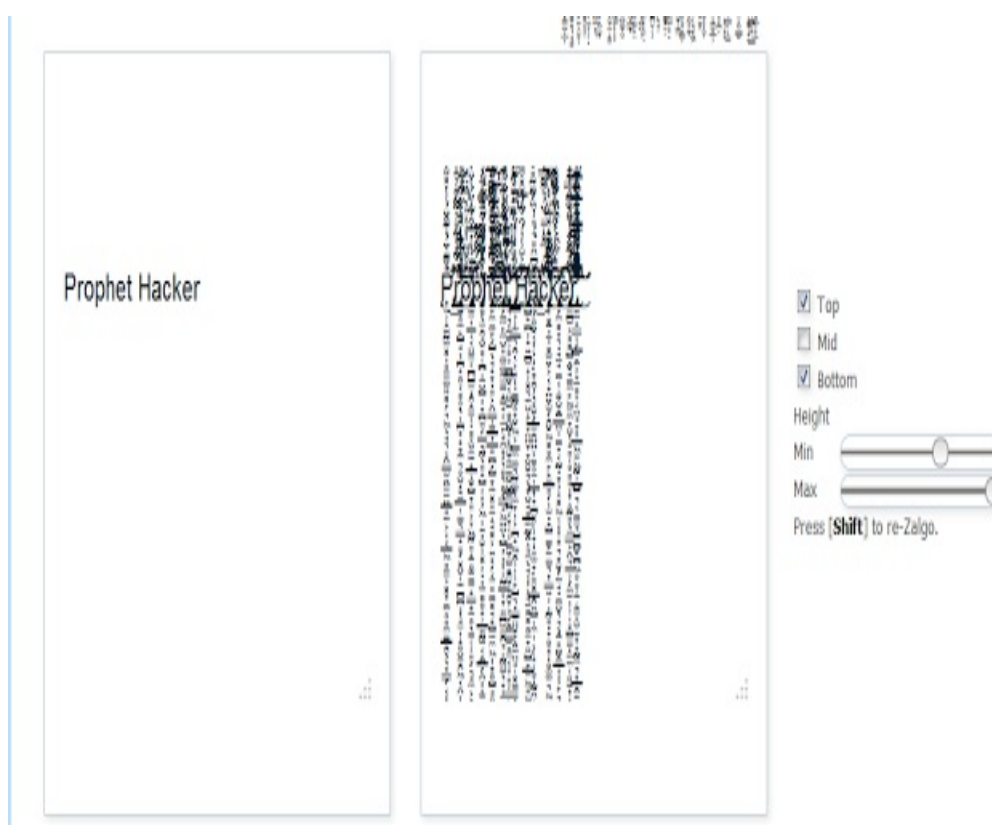

How will you feel when you see something scary on Facebook statuses? or something that looks like if is a bug on Facebook? Well, here i gonna share something exactly matching that same thing that will prank your Facebook friend by posting something scary/grungy text effect called zalgo text. I will provide you a link of zalgo text generator below that will allow you to generate amazing scary text that you can easily post on Facebook status even you can directly paste into Facebook chat.

Step 1

Go to Zalgo Text Generator

Step 2

There you will see text generator tool like below :

Step 3

Now, just write something that you like on first box and your new scary

zalgo text will be generated in the other box right on it's side.

Step 4

Also you have some more option that you can configure in order to make your text effect more outstanding and look more scary, so check those too.

Step 5

now you have to copy the text and then you can easily paste and post on your facebook timeline as statues update or into your facebook chat.

Your done

Write Upside down Facebook Status Update

Do you want post new type of status update then this for you? By using this service you can flip text and post that upside down text as your status update. This one of the used tricks in 2015 for prank facebook friends.

To do that open www.fliptext.org and write text message what you want to post on your Facebook status. After writing message copy the output text and paste it as your status update.

Download Facebook Videos without any Software

When your Facebook Friends share Fb videos you like and you wanna download but there is a problem ,there is no option to download it. There is a site named

<http://www.downvids.net/> and <http://www.downfacebook.com/> which can provide you direct link to download Facebook Videos.

Find Who Un friend you on Facebook

Do you want to know who un friend you on Facebook? Actually there is no option for this on Facebook but you can get those details through this online service. This service scan your profile and find all changes done on your profile. In that way it can find who un friend you on Facebook and show them.

To get those details open who.deleted.me on browser and login with your Facebook details. After that it shows the details about person who un friend you on Facebook with date, week, month and graph wise.

Live BroadCasting Using Facebook

Live broadcasting on with a custom channel is now possible directly on Facebook using ustream. Using ustream Facebook application you can record videos or broadcast live and share it with your friends and followers on Facebook.

How to Send Friend Requests When Blocked

Sometimes Facebook block accounts for sending massive friend requests to unknown persons. After getting blocked, you will not be able to send friend requests on Facebook even to people you personally know. Here is a cool trick that will allow you to send friend requests to people even if you are blocked.

Login to Facebook account and get the email address of the person you want to add to as a friend. Then [click here](#) and you will be able to add friends by using different email services. Login with any of those email services and add your required contacts to Facebook.

If you want to add bulk friends then create a notepad file with comma separated email contacts and save it as filename.vcf

Finally upload that file through the previous window and your friend request will be sent to Facebook users with those email addresses.

Check Who Is Online and pretending to be Offline

Sometimes people disable Facebook chat and pretend as if they are not using Facebook. Now you can easily detect which friend is using Facebook secretly while keeping Facebook Chat offline. Online Now application for Facebook allows you to track hidden online friends easily.

[Click here](#)

Login to Multiple Facebook account at a oneTime

By using Google chrome Browser, you can login to multiple Facebook accounts at a time. Open Google chrome and login to your Facebook account. Then click the settings tab and add a new user to chrome browser. It will open a new chrome window where you can login to other Facebook account. Now, you will be able to use and manage both accounts using the two chrome windows. In the similar manner, you can access as many Facebook accounts as you like using Google chrome.

Invite all Facebook Friends for FB Page
